

About Me

To obtain a position through which I would be able to utilize my SKA for provided role and I am looking forward for innovative challenges in development technologies.

Education

Pondicherry University Pondicherry

2014 - 2022

M.Sc-Statistics

Skills

data science

Data Analysis

NLP

ML

Machine Learning

Statistical Analysis

EDA

Power BI Desktop

SQL

MySQL

Github

Sentiment Analysis

Artificial Intelligence

Big Data

R programming

Python

pandas

Matplotlib

Translator

Experience

Pondicherry University, Department of statistics-Project work, major

2020 - 2020

PROJECT Title "Sentiment Analysis of tags (covid19 a Pandemic of the Decade) From Twitter Data" six month as a part of Master Degree (M.Sc.).

Used Python programming language NLP ML Tweepy Framework

iNeuronai-Data Science Intern

2022 - Present

Doing Internship in ineuron under the guidance of Mr. Sudhanshu. And learning data analysis skills big data EDA etc.

Projects

Sentiment Analysis of covid-19 of Twitter Data

In this project I used tweeter api for accessing tweeter data used NLP ML and found For million of tweet analysed we got Insight as positive tweets percentage are far higher as People sentiments more positive than negative towards the covid19.

Achievements

Rank 1 and 5 star on with score of 2305 points, for basic and Intermediate Python programming and 5 star for MySQL skill on HackerRank Website. Have hands on EDA projects, data analysis, sales analysis.
